ASHUTOSH SHEHRA

Indore, India| +91 78983 74572 | https://ashutoshshehra.github.io/Portfolio/

SUMMARY

Computer Science engineering student with knowledge of Java, Data Structures and Algorithms, JSP, Servlets, JDBC, MySQL, HTML, CSS and JavaScript. Have worked on web development projects, including an online examination system and a Java-based security system. Currently learning Spring and improving my Java programming skills. Looking for a Software Development Internship where I can apply my skills and gain practical experience.

TECHNICAL SKILLS

Programming: Java, C/C++, JavaScript

Java: OOP, Collections Framework, Multithreading, JDBC

Web: HTML, CSS, JSP, Servlets

Framework: Spring (Currently Learning)

Database: MySQL

Concepts: DSA, MVC, DAO, Service Layer, Session Management

Tools: NetBeans, Eclipse, Apache Tomcat, GlassFish Server

PROJECTS

AEGIS – Autonomous Enterprise Security & Intelligence System

Java 21 | Jakarta Servlets | JSP | JDBC | MySQL | HTML/CSS | JavaScript

• Made a Java-based security system with login, user roles, session security and project management.

• Added password recovery and different security checks for user accounts.

• Added features like rate limiting, CSRF protection, IDOR protection, password hashing and audit logs.

• Worked on security testing, attack simulations, rollback and security update handling.

• Used MVC, DAO, Service Layer, OOP, JDBC transactions and multithreading concepts.

• Created and tested the project with 850+ automated test cases.

AnnPath – Smart Food Surplus Management & Redistribution Platform

Java | JSP | Servlets | JDBC | MySQL | HTML/CSS/JavaScript | MVC | DAO

• Developed a web platform connecting Donors, NGOs and Volunteers for surplus food distribution.

• Created a matching system based on food quantity, category, distance, availability and urgency.

• Added the complete process from donation and matching to pickup, delivery and distribution.

• Added OTP authentication, role-based access, password hashing, CSRF/XSS protection and database transactions.

SmartExam – Online Examination System

Java | JSP | Servlets | MySQL | HTML/CSS | JavaScript

• Made an online examination system using Java and web technologies.

• Added separate login and features for Admin and Student.

• Added question management, online exams and automatic result calculation.

• Used MySQL and JDBC to store users, questions and exam results.

• Tested the project using GlassFish Server.

EDUCATION

Swami Vivekanand College of Engineering | Bachelor of Technology (Computer Science) | 2023–2027
CGPA: 7.0 (through 3rd year)

Mar Thoma Public School | 12th, M.P. Board | 2023 | 63.0%

Mar Thoma Public School | 10th, M.P. Board | 2021 | 73.0%

INTERNSHIP / TRAINING

Java Trainee – Softwaves Technologies

• Learned the basics of Java and object-oriented programming.

• Practiced creating dynamic web pages using JSP and Servlets.

• Worked with JDBC for connecting Java applications with MySQL databases.

• Practiced Java coding problems and worked on small programs to improve programming skills.

Data Structures – Softwaves Technologies

• Learned different data structures and their implementation.

• Practiced coding problems using data structures.

• Practiced sorting algorithms and binary search.

SOFT SKILLS

Problem-solving | Analytical Thinking | Self-motivated | Quick Learner
